Judiciary	6,983,735.14	14,012,160.16	7,028,425.02	
War Department	118,619,520.15	115,035,410.58		3,584,109.57
Navy Department	82,618,034.18	102,956,101.55	20,338,067.37	
Indians	12,935,168.08	10,438,350.09		2,496,817.99
Pensions	138,425,646.07	142,559,266.36	4,133,620.29	
Interest	28,556,348.82	24,646,489.81		3,909,859.01
Total.....	506,099,007.04	582,402,321.31	107,607,964.15	31,304,649.88
Net			76,303,314.27	
Surplus (+); deficit (—).....	+54,297,667.36	—41,770,571.91		

On the side of the revenues, in 1904 as compared with 1903, customs show a decrease of \$23,205,017, and the receipts from public lands are less by \$1,472,831.50, while an increase appears in internal revenue of \$2,093,995.25 and in miscellaneous items of \$2,818,928.25. The net result is a decrease in revenues for the year of \$19,764,925. In expenditures in the last fiscal year as compared with its predecessor, there

was an increase in the charges for Commerce and Labor of \$11,423.-446.12; for the Treasury of \$60,788,580.53; for diplomatic service of \$3,895,824.82; for the judiciary of \$7,028,425.02; for the Navy of \$20,338,067.37, and for pensions of \$4,133,620.29. A decrease took place in the outlay for customs of \$7,162,144.87; for internal revenue of \$5,274,113.89; for interior civil of \$8,877,604.55; for the War Department of \$3,584,109.57; for Indians of \$2,496,817.99, and for interest of \$3,909,859.01. Thus an apparent net increase in expenditures is recorded of \$76,303,314.27. Against the surplus of \$54,297.-667.36, June 30, 1903, a deficit of \$41,770,571.91 is presented for June 30, 1904.

In the expenditures for the Treasury for 1904 are included \$50,000.-000 on account of the Panama Canal and \$4,600,000 loaned to the Louisiana Purchase Exposition Company; the latter sum has since been reimbursed. If these extraordinary items are deducted, the net increase in expenditures during the year will be brought down to \$21,703,314.22, and the recorded deficit will be changed to a surplus of \$12,829,428.09.

The expenditures, without including the payments for the Panama Canal and the loan to the exposition company, exceeded the revenues in these six months:

Month and year.	Amount of excess.	Month and year.	Amount of excess.
1903.		1904.	
July.....	\$7,776,612.65	April.....	\$3,480,843.15
October.....	4,947,265.78	May.....	5,130,412.71
November.....	2,735,193.22	Total.....	30,854,510.78
1904.			
January.....	6,784,183.27		

The revenues were greater than the expenditures in the other six months, to wit:

Month and year.	Amount of excess.	Month and year.	Amount of excess.

December.....	10,491,787.37	Total.....	43,683,938.87
1904.			
February.....	5,240,634.28		

TRANSACTIONS IN THE PUBLIC DEBT.

The details of business connected with the public debt, stated below, exhibit an increase in receipts in 1904 over 1903 of \$48,663,518, and an increase in disbursements of \$22,375,720.94. Every item of the receipts in the last fiscal year exceeds the corresponding one for the preceding twelve months, except United States bonds, in which the movement was \$51,435,050 less, and the premium on consols of 1930, in which a falling off appears of \$1,028,712. In disbursements an increase will be noted in every item, except that a falling off is presented in United States bonds of \$49,421,610, in fractional currency of \$92.25; in Treasury notes of 1890 of \$4,492,000, and in premium on bonds purchased and exchanged of \$9,649,541.81.

REVENUES AND EXPENDITURES, FIRST QUARTER OF 1904 AND 1905.

The figures for the first three months of 1905 are preliminary and will be slightly modified by later statements. As they stand, they show, as compared with the same period a year previous, a falling off in receipts of \$10,530,041.34, divided between customs at \$7,664,070.41, internal revenue at \$1,649,102.21, and public lands at \$1,216,868.72, while miscellaneous items show an increase of \$4,013,668.19. Thus

the receipts exhibit in comparison a net loss of \$6,516,373.15. The expenditures are greater in the first quarter of 1905 than for that of 1904, except in pensions, which are \$795,790.22 less, and the result is a net increase of \$18,073,539.27. Upon the balance an excess of expenditures is created of \$17,856,615. Such excess occurred in July for \$17,407,727.97, and in August for \$6,343,212.28, while in September the receipts were greater than the expenditures by \$5,894,325.25.

THE RESERVE AND TRUST FUNDS.

United States notes to the amount of \$11,081,068 were redeemed in gold during the past fiscal year, exceeding like transactions in 1903 by \$3,926,350. Treasury notes were so redeemed for \$473,976, which is \$638,551 less than for the preceding year.

At the end of the fiscal year, from the revised figures, the respective funds were:

The trust funds are greater at the beginning of the fiscal year 1905 than twelve months earlier by \$85,015,700 by reason of changes in the currency for which they are held. These changes are explained on following pages.

On October 1, 1904, the reserve and trust funds became:

GENERAL FUND—CASH IN THE VAULTS.

By reason of the change in the ratio of the revenues and expenditures, the cash in the ten offices of the Treasury and the mint and assay offices was less at the close of the last fiscal year than at its beginning by \$32,500,297.98. The falling off in gold coin and bullion for the period exceeds this sum and amounts to \$35,092,667.83, while gold certificates were reduced by \$2,885,840. Other items exhibit no significant modifications, except that national-bank notes are more by \$2,533,317.65, and subsidiary silver by \$2,225,804.97.

The deposits in national banks to the credit of the Treasurer attained a maximum at \$159,111,708.15 December 19, 1903, and became \$102,290,863.64 at the end of the fiscal year, which was a reduction of \$37,936,271.61 as compared with that of twelve months before, while to those to the credit of disbursing officers additions of \$819,914.58 were made.

In the treasury of the Philippine Islands, under act of Congress, \$3,516,709.89 was placed during the year to the credit of the Treasurer of the United States, while the moneys there to the credit of United States disbursing officers were reduced by \$1,492,566.59.

The outstanding liabilities in the two years differ in an increase in the 5 per cent fund of the national banks of \$1,675,089.56; in checks and warrants of \$2,880,267.85, a decrease in disbursing officers' balances of \$5,914,731.74, and in Post-Office Department account of \$490,842.41, with an increase in miscellaneous items of \$904,284.41. These changes make the total outstanding liabilities at the close of the fiscal year \$945,932.33 less than at its beginning.

In the first quarter of 1905, the cash in the vaults of the Treasury underwent a reduction of \$11,555,376.34. Gold coin and bullion became less by \$6,089,116.47, while gold certificates were \$13,004,360 more. Reductions also took place of \$9,573,001 in silver dollars; of \$3,155,178 in silver certificates; of \$3,165,333 in United States notes; of \$2,155,337.88, in national-bank notes, and smaller sums in other items.

In this quarter the deposits in national banks to the credit of the Treasurer of the United States were increased by items in transit by \$1,965,363.32, and those to the credit of disbursing officers were reduced by \$388,111.55.

An increase in outstanding liabilities in the quarter is shown of \$10,317,143.07. This is due to an addition of \$3,512,404.18 in checks and warrants; of \$17,377,366.40 in balances of disbursing officers. During the same period a decrease occurred in the redemption fund of national banks of \$1,598,991.57; in the post-office account of \$2,448,214.17, and in miscellaneous items of \$6,525,421.77.

The state of the general fund at the close of 1903, of 1904, and of the first quarter of 1905, is here recorded:

AVAILABLE CASH BALANCE.

The transactions reported left the available cash balance of \$172,-051,568.02 June 30, 1904, which is \$66,634,546.21 less than on June 30, 1903. It is also less than it was on the same date in any year since 1900. Of this diminished balance at the close of the fiscal year 1904, national banks held \$102,290,863.64 in general account. Gold in coin, bullion, and certificates in the general fund was \$66,183,722.60. The like processes prevailed in the first quarter of 1905. The balance fell off in those three months \$20,637,405.20. The national bank depositaries held of the total, \$104,256,226.96, while gold, in coin, bullion, and certificates, rose to \$73,098,966.13.

For the years since 1890, and the first quarter of 1905, the available cash balance is set forth in the subjoined table:

BONDS REDEEMED BEFORE MATURITY.

The loan of 1904 matured February 1 of that year. The Secretary of the Treasury offered, September 23, to anticipate payment of these bonds with interest to maturity, and \$14,712,450 with interest of \$300,042.59 were so paid, while since their maturity under notice of November 2, 1903, payments were made to the amount of \$3,894,750, with \$38,319.05 for interest. At the close of the fiscal year of these bonds the sum of \$777,850 remained, and stood in the account of the "debt on which interest has ceased since maturity."

THE PUBLIC DEBT 1903 AND 1904 AND FIRST QUARTER OF 1905.

During the fiscal year 1904 an addition of \$22,766,800 took place in the consols of 1930, while there were reductions of \$5,971,700 in the loan of 1908-1918 and of \$16,792,500 funded loan of 1907. By the maturity of the loan of 1904 such bonds for \$19,385,050 disappeared, save as \$777,850 were transferred to the matured loans. The fund held for redemption of national-bank notes fell off \$4,526,766. Gold certificates increased \$85,180,700 and silver certificates \$5,770,000, for which the Treasury holds the respective metals for the full amounts. By change into certificates against dollars coined from the bullion of 1900, Treasury notes for \$6,265,000 were canceled. By the additions to the certificates beyond reductions in other items an apparent increase in the public debt of \$61,538,803.25 is recorded.

In the first quarter of 1905 there was a reduction of \$308,700 in the matured loans, of \$2,153,407 in national-bank notes, and in Treasury notes of \$1,012,000; to gold certificates an addition of \$34,201,400 and to silver certificates of \$3,846,000. The apparent increase of \$34,573,483 in the total debt is thus more than covered by the certificates for which gold and silver coins are held.

In the annexed table the figures for two years and a quarter are detailed:

PAYMENTS ON ACCOUNT OF THE PANAMA CANAL.

Under the law and treaty, warrants for \$10,000,000 were issued to the Government of Panama for the Canal Zone in two installments: One April 29, 1904, for \$1,000,000, and another May 19, for \$9,000,000. The first was cashed May 3 and the second May 20.

To the Panama Canal Company a warrant for \$40,000,000 was issued May 9, 1904, and was paid the same day.

These warrants were severally drawn on the New York office and were paid there.

LOAN TO THE LOUISIANA PURCHASE EXPOSITION COMPANY.

By the urgent deficiency act passed at the last session of Congress provision was made for the advance of \$4,600,000 to the Louisiana Purchase Exposition Company, at fixed dates, to be reimbursed in later months. Accordingly warrants were issued to that company on February 24 for \$1,000,000, on February 26 for \$1,000,000, on March 8 for \$1,000,000, on April 9 for \$1,000,000, and on May 7 for \$600,000, an aggregate of \$4,600,000.

This full sum, as it has become due under the terms of the act, has been reimbursed, leaving at the date of this report the final payment of \$191,850.81 yet to be provided. The installments have been:

CALLS ON BANKS FOR PART OF DEPOSITS.

The Secretary of the Treasury issued during the year three calls on the depositary banks for the return of a part of the public moneys deposited with them. They responded with promptness, paying back the sums required of them. The amounts of deposits thus recalled were as stated below at the dates named:

Under call of March 4, 1904, payable March 25, 1904.....	\$28,067,560.00
Under call of April 30, 1904, payable May 10, 1904.....	11,967,981.77

BONDS HELD AS SECURITY FOR NATIONAL BANKS.

The additions to their circulation by national banks and the withdrawal of a part of the deposits of public moneys caused many changes during the year in the bonds pledged by them as security. Those securing circulation were increased by \$40,947,920, and from July 1 to October 1, by a further sum of \$8,684,800.

The bonds held against deposits, on the other hand, fell off, in New York and Washington, \$32,868,470 during the last fiscal year. In the first quarter of 1905 a decrease of \$4,591,700 took place.

In the securities given by national banks for both purposes, consols of 1930 stand for \$491,420,100, July 1, 1904. This is 91.7 per cent of such securities and 90.5 per cent of the entire volume of the consols.

NATIONAL BANKS BY GROUPS.

The expansion of national banks during the past three years is a notable feature in our financial system. If they are grouped by the amounts of bonds pledged by them to secure circulation, interesting comparisons result. The increase in the number of banks during the

year was 395, and of these 262 deposited for circulation bonds for less than \$100,000 each, and 381 less than \$500,000 each.

The table subjoined presents the details:

BONDS FOR DEPOSITS BY GROUPS.

The number of depositaries was greater in the fiscal year 1904 than in 1903 by 129. Of the additions 5 were in the class styled regular, receiving collections of internal revenue day by day, and 124 in that called special, to which transfers are made in gross sums. The bonds deposited by these banks can be grouped by amounts, and the result will appear in the following table:

STATE AND MUNICIPAL BONDS FOR PUBLIC DEPOSITS.

The State and municipal bonds pledged for public deposits were at their maximum November 29, 1902, at \$20,505,500. By June 30, 1903, a reduction of \$3,214,600 was effected, and by June 30, 1904, a further reduction took place of \$13,615,400. The decrease continued at a less rapid rate, and from July 1 to October 1 of the current year it was \$704,000, bringing the total to \$2,971,500.

The descriptions of such bonds held at the different dates will be seen here:

DUTY ON BANK NOTES PAID.

The semiannual duty on the circulating notes of the national banks is paid to the Treasurer of the United States. Each bank presents a statement of the average amount of its notes in circulation, and upon this volume the tax is paid. By States and groups of States, this duty for the past fiscal year is set forth in Table 66, page 163. The total duty paid was, in 1903, \$1,708,819.92, and in 1904, \$1,928,837.49, an increase of \$220,017.57.

GENERAL STOCK OF MONEY IN THE UNITED STATES.

The total stock of money in the country at the close of the past fiscal year was \$118,793,148 greater than on the first of the preceding July. The additions were \$78,974,870 in gold coin and bullion; \$5,491,379 in silver dollars; \$5,027,454 in subsidiary silver, and \$35,564,445 in national bank notes, while a reduction took place of \$6,265,000 in Treasury notes. The gold and silver certificates are not included in the stock of money, as they are represented by the coins for which they stand.

By October 1 a further increase was recorded in the stock of money of \$31,829,599, and that in gold coin and bullion was \$23,799,570, and in bank notes \$6,844,313, while there was a reduction in silver dollars of \$1,040,577 and in Treasury notes of \$1,012,000.

The details are recited below:

RATIO OF GOLD TO THE TOTAL STOCK OF MONEY.

The constant increase in the share of gold to the total stock of money in the country has attracted much attention within recent months. Within five years to July 1, the gold has advanced by \$293,271,954, and in the last fiscal year by \$78,974,870. The share of gold which

July 1, 1900, was 44.21 per cent became 47.35 on the same date in 1904, and by October 1, in the latter year, had reached 47.66 per cent. The steps in this growth may be studied in the subjoined table:

GOLD IN THE TREASURY.

A goodly part of the increment in the yellow metal has settled into the Treasury vaults. Between July 1, 1900, and the beginning of the current fiscal year, the Treasury has gained in this form \$258,260,849.92, and a further gain followed of \$27,772,283.53 from July 1 to October 1. The treasure in the official vaults on the last-named date amounted to \$709,611,105.13. By October 31 the Treasury held in gold \$721,253,987.88. The record from 1897 by years follows:

ACTUAL GOLD COIN IN USE AS CURRENCY.

When specie payments were resumed January 1, 1879, the amount of gold coin in circulation was \$96,262,850. On the same date in 1889 it had reached \$379,834,512, and ten years later, in 1899, the sum was \$667,796,579. Our people take more kindly to certificates than to coin, and the increase of the former has been in recent years much the more rapid.

Gold certificates, which for the first time at the end of any month attained the sum of \$111,980,380 on January 31, 1885, after February, 1886, stood below a hundred million dollars, with the exception of two months only until May, 1888. They ran as high as \$163,178,959 at the close of January, 1892, but fell below a hundred million dollars again in June, 1893. They became less quite steadily up to July, 1899, when they stood at \$32,593,789. An advance began in August of that year, which may be traced in Table No. 23, page 79, until the high figures of \$465,655,099 were reached July 1, 1904, and again a higher sum at \$490,193,759 October 31, 1904.

July 1, 1904, the actual gold coin in use was \$645,817,576, and October 1, 1904, it was \$641,844,863. Of this sum the banks, national and other, held about \$300,000,000.

It is fair to remark that the figures for the gold in our stock of money and in circulation are pronounced by critics to be probably \$60,000,000 above the volume that can be definitely shown to be in existence. With this doubt in mind the growth of the use of the yellow metal as coin is presented in this table:

MONEY IN CIRCULATION.

No element in our financial system deserves more thoughtful consideration than the immense and continuous growth in the money in circulation in this country. Since July 1, 1900, this growth has been \$463,991,862, or a yearly average of over \$115,900,000. During the past fiscal year the addition to the circulation reached the vast sum of \$151,450,691. The share of the increment within four years, in gold coin and certificates, was nearly \$300,000,000 (\$299,933,184); and in the last fiscal year \$116,953,377. National banks furnished in four years an increment of \$132,912,724, of which \$33,031,127 was in the last fiscal year. In silver certificates, standard dollars, and subsidiary

silver, the increase in four years was \$77,464,959, of which \$8,129,920 was in the last fiscal year. Treasury notes under process of law were reduced \$6,174,591 during the year. The variations in United States notes are slight.

During the year the circulation in the ratio to each person advanced to \$30.77 and the share of gold to the total became 44.12 per cent, marking again the growth in the yellow metal.

For the first quarter of the fiscal year 1905, the increase in the circulation kept on, and amounted to \$43,006,629. Of this sum, gold coin and certificates supplied \$16,884,327; national bank notes \$8,999,651, and silver in its three forms, \$14,999,276.

The circulation for each person reached the maximum at \$31.16, while the share of gold became 44.03 per cent.

The details are worthy of perusal:

CIRCULATION AND POPULATION.

The relation of the circulating medium to the population attracts attention, and the notable excess in the growth of the former over the latter invites special consideration. This phenomenon is to be studied in its connection with many other factors, such as extension of habitation into remote districts, multiplication of lines of traffic, as well as the development of the aggregate of industry and activity. The problem is only suggested here. The notable fact is that with an addition of 1.7 per cent to the population in the year, the increase in the circulation has been 4.5 per cent.

WITHDRAWAL OF TREASURY NOTES.

The withdrawal of Treasury notes as they have reached the Treasury in regular course has been prosecuted during the past year, as before, under the act of March 14, 1900. Their total volume was reduced by \$6,265,000 from July 1, 1903, to July 1, 1904, and again by \$1,012,000 to October 1. The reduction naturally diminishes year by year, but the ratio of such decrease to the notes outstanding also steadily grows less. The percentage of the reduction to the amount outstanding March 14, 1900, to July 1, 1901, was 44.93; and from the beginning of July preceding was, in 1902, 37.21; in 1903, 35.85; in 1904, 32.55, and in July, August, and September, 1904, 7.78.

The table shows the share of silver certificates and of subsidiary coin substituted for Treasury notes:

	Mar. 14, 1900.	July 1, 1901.	July 1, 1902.	July 1, 1903.	July 1, 1904.	Oct. 1, 1904.

a Bullion purchased under the act of July 14, 1890, used in the coinage of subsidiary silver (act Mar. 14, 1900, sec. 8), from Mar., 1900, to Oct. 1, 1904).

CLASSIFICATION OF CURRENCY OF \$20 AND BELOW AND ABOVE \$20.

In 1900 the paper currency of \$50 and over increased by 23.20 per cent, while that of \$20 and less increased 10.96 per cent. In all paper the increment was 13.70 per cent. In 1901 the larger bills took on additions of 2.86 per cent, and the smaller 7.11 per cent, while in all paper these were 6.08 per cent. In 1902 the total volume grew by 5.08 per cent, the larger bills by only 1.34 per cent, and the smaller bills by 6.23 per cent. In 1903 the advance was in the total 6.38 per cent, the larger bills by 2.93 per cent, and the smaller bills by 7.39 per cent. In 1904 the growth was in total value 8.84 per cent, in small bills 3.17 per cent, while owing to a vast issue of gold certificates the large denominations grew 29.01 per cent.

These calculations can be verified by the details subjoined:

STEADY DEMAND FOR SMALL BILLS.

The gold certificates received an increment of \$85,512,700 during the past fiscal year, and they were all of \$20 or of much larger denominations, yet the ratio of bills of \$10 and less to the total currency remained as high as 54.58 per cent July 1 and 53.80 per cent October 1. The relation of all denominations of paper to each other may best be studied from the monthly statement for September 30 of the current year, where the amounts are more emphatic even than the ratio.

ACTION OF THE DEPARTMENT.

In the current fiscal year the demand for small bills, in spite of all previous additions, has been unceasing in every month, becoming larger in the autumn, as in other years. For shipments to Chicago and New Orleans, to be paid in much the greater part in bills of \$20 and below, the deposits offered in New York are almost always in large gold certificates. Thus the process in the movement of the crops is the exchange of gold for silver dollars, silver certificates, and United States \$10 notes.

The Department is able to keep up this exchange by vigilance and forethought in gathering such small currency for the anticipated needs of the farmers, merchants and banks. On August 22 of the current year, just before the call began for money for the crops, the Treasury held in its ten offices, in United States notes, nearly all in \$10 notes, \$15,716,020; in silver dollars, \$22,641,903; and in silver certificates, all in \$1, \$2, and \$5 certificates, \$7,100,458. This is a total of over \$45,000,000, which, with allowance for daily holdings in the cash, was available for the autumn business. By October 31 this sum was brought down to \$11,068,801, of which United States notes were \$4,548,595; silver certificates, \$5,750,168, and silver dollars, \$770,038. Of the silver dollars \$10,345,865 was paid out in coin, and for \$11,526,000 silver certificates were issued. The drain was uninterrupted at that date, and was further maintained.

THE BANKS ARE HELPFUL.

In addition to the shipments by the Treasury the banks in the chief cities forward small notes to their correspondents as called upon. To enable them to render this service the institutions holding deposits of many banks are in the habit of placing, in spring and summer, United States notes and silver certificates in their reserve, for which they are available. By this practice the requirements of the autumn are in part readily provided for. The paper currency, if fit for circulation, can be put to no better use than to be set aside as reserve for the exigency which the autumn is sure to bring. Such forethought by the banks is wise and commendable. Institutions which do not adopt this course may gain profit by the example thus presented.

' SUPPLY OF SMALL DENOMINATIONS NOT EQUAL TO THE DEMAND.

Experience in all recent years makes clear that the supply of small notes is hardly equal to the demand. That supply in its ratio to the total paper currency is far below that which has prevailed in the case of issues of State banks. A careful inquiry indicates that in Massachusetts, in 1860, 20 per cent of its paper was in less denominations than \$5, while in New York in the same year the paper currency was 17 per cent in bills below \$5, and 44 per cent in bills of \$5 and less. Vast changes in monetary conditions have occurred in the interval that has elapsed, notably in the use of checks and other instruments of credit; but that use affects as much and perhaps more the larger denominations.

No rule can be set up by theory of the proper ratio of the several denominations to each other. The needs of business must be recognized and obeyed. Those needs clamor vociferously for small bills as instruments of local trade. The appeal is not confined to any particular district. It comes from the cotton and sugar regions, as well as from the States which produce wheat and corn, cattle and swine. Cities and towns where the pay rolls for factories and furnaces are large assert the same urgency.

CHANGES IN DENOMINATIONS.

The Department has employed all its resources to respond to the conditions. A reserve ample for immediate use, and growing for future contingencies, has been provided of all denominations. Silver certificates are turned, as they are offered for redemption, into \$1, \$2, and \$5, and United States notes into \$10. But the entire volume of silver certificates can not exceed that of silver dollars available; the limit of United States notes is fixed by statute. The issue in both classes can only keep pace with the redemptions.

CONGRESS CAN PROVIDE REMEDIES.

Congress has it within its power to add to the volume of small denominations without inflating the currency. First, gold certificates may be authorized for \$5 and \$10, instead of restricting the issue as now to \$20 and above; second, for United States notes such certificates may be substituted to the amount of \$50,000,000 at once by the application of that sum from the reserve, and a like sum may wisely be used annually from the inflow of gold; third, the national banks may be permitted to issue any part of their circulation in \$5 notes by the repeal of the provision allowing only one-third of their respective totals in that denomination.

Under such modifications enough \$5 notes could be issued for the requirements of the present and the immediate future. Relief on that line would permit a larger share of silver certificates to serve as \$1 and \$2, with such amount in \$5 as experience might prove to be desirable.

Doubtless if the matter were sent to a referendum the popular majority would pronounce for an adequate supply of small bills. Possibly Congress can devise some wiser and more efficient method to stop complaint and friction in the business community. Surely the existing difficulties are not without remedy.

COST OF PAPER CURRENCY.

Inquiries often reach the Department relating to the production and the cost of the paper currency issued by the Government. A useful purpose may be served by stating that the paper used is made by a secret process under Treasury supervision by special contract, renewed every year. The Bureau of Engraving and Printing, a branch of the Department, designs, under the direction of the Secretary, engraves, and prints the notes and certificates complete, except for the colored seal and mark of the denomination, which are added in the office of the Treasurer of the United States. This currency is delivered to that office in packages of one thousand sheets, each consisting of four notes or certificates. Such a package is taken as the unit from which to reckon the cost.

With allowance for every item of expense attending the making, the issue, and the redemption of this paper currency, an elaborate investigation upon the experience of the fiscal year 1903 shows the average cost for each piece to be something less than 2 cents—exactly 1.7005 cents.

The details of the reckoning may be followed here:

Cost of each 1,000 sheets of paper delivered to the Bureau of Engraving and Printing	\$5. 96
Cost of engraving and printing each 1,000 sheets (4,000 notes) of perfect work delivered to the Treasurer of the United States	44. 04
Cost of sealing, separating, bundling, and issuing each 1,000 sheets (4,000 notes)	7. 56
Total average expense of 4,000 notes issued	\$57. 56
Total average expense of 4,000 notes redeemed	10. 46
Aggregate average expense of issue and redemption	68. 02
Average expense of issue and redemption of each note	0. 017005

THE AVERAGE LIFE OF GOVERNMENT PAPER CURRENCY.

An extensive and searching study made for this report brings out an interesting exhibit relative to the length of service of the Government notes and certificates. Activity in their movement from and to the Treasury varies with the seasons. From the middle of August to the close of December they go out in largest volume for the handling of the crops, and in that period, in order to secure small bills, large denominations, worn or in good condition, are freely sent in for redemption. Then, from January forward to July the smaller notes which flow into the banks in excess of their immediate needs are returned for redemption. Some institutions, and an increasing number, are forming the habit of placing this excess in their reserves for use later. Because all kinds of money are paid at the option of the depositor, by the Treasury, for any other kinds redeemed, subject only to the limit of total volume fixed by statute, the facility of change from one denomination to another is maintained at the maximum.

The United States notes under the present system were first issued April 2, 1862; the Treasury notes August 19, 1890; the gold certificates November 15, 1865; and the silver certificates April 11, 1878. The period covered in determining the life-time of each piece in the several kinds of currency varies accordingly. The United States notes, it will be observed, have had an average duration of service of 3.695 years; the gold certificates of 2.877 years; the Treasury notes of 2.136 years; and the silver certificates, as the instruments of retail trade, of only 1.717 years.

The denomination of \$10,000 both in United States notes and in gold certificates has been used in large measure for clearing-house purposes, and naturally has passed but little from hand to hand, and especially those payable to order have been quickly redeemed. Banks have shown a preference for United States notes of all sizes, and these have been held at rest as far as convenient.

The denominations serving for the longest period have been in United States notes, \$20 serving an average of 5.842 years, \$50 an average of 6.008 years, and \$100 an average of 6.020 years. In Treasury notes the average life of those of \$10, \$20, \$50, and \$100 is in each case over three years, that of \$20 exceeding all others and reaching 3.815 years. In gold certificates those which last the longest time are \$50, \$100, and \$500, while in silver certificates the service of \$10, \$20, and \$50 covers the longest period. The duration of the life of \$50 and \$100 in all kinds of currency is noteworthy.

By kinds and denominations the average years of the life of each piece of currency is here set forth:

COMPARISON WITH EXPERIENCE OF 1904.

Interest attaches to the comparison with the duration of service of the several kinds of paper currency during the longer period cited with the experience during 1904 in all classes except national-bank notes. The redemptions for that year are assumed to indicate average life years. The comparison is rendered clear by setting down the results for the longer periods on each kind of money and of all kinds for the various denominations. The differences, as well as the agreements, well deserve study. The longer the period taken into account the nearer to accuracy will the result attain, while on any formula the conclusion can be only approximate. The tables here presented are believed to approach actual verity as closely as the data will permit.

The experience of a single year has value as an illustration:

THE AVERAGE LIFE OF NATIONAL-BANK NOTES.

Some complexity confronts us in seeking a comparison of the average existence of Government paper with that of national-bank notes. The tables show for bank notes an average life of 4.058 years, while for United States notes the record is 3.695 years; for Treasury notes, 2.136 years; for gold certificates, 2.877 years, and for silver certificates, 1.717 years. The ones and twos and the highest denominations survive the shortest period. In the case of bank notes this rule does not prevail. The ones and twos seem to live longer than the twenty dollars and the hundred dollars.

The national-bank circulation, it is fair to state, owes its apparent advantage of longevity to the circumstance that the original plan of redemption was found to be practically inefficient. Up to October 31, 1873, with an aggregate issue of \$481,196,161, and a balance of \$348,347,674 outstanding, the total redemptions were only \$132,848,487. This would indicate an average life of about six and a half years. Since the inauguration of the present system of redemptions in the office of the Treasurer on July 1, 1874, these notes have been freely retired on becoming unserviceable, with a consequent shortening of their life, but the records of the earlier period still affect the calculations based on the whole history of the issue. With reference to the denominations of \$1 and \$2, the results are affected by the fact that no such notes were issued after January 1, 1879, while the redemption of those outstanding has kept on.

This calculation is based on the total number of notes issued since the establishment of the system.

EXPERIENCE OF ONE YEAR WITH BANK NOTES.

To set beside the experience of one year with Government paper, a calculation is here given of the apparent average life of bank notes for the twelve months ended October 1, 1903:

Under the provisions of the national-bank act no notes of a less denomination than \$5 were furnished to the banks after the resumption of specie payments on January 1, 1879. Since then the yearly redemptions of \$1 and \$2 notes have steadily diminished. In the year ending October 31, 1903, but 28 notes of the former denomination and 7 of the latter were retired, leaving a balance of \$345,956 of the ones and \$165,960 of the twos outstanding. The last issue of the denomination of \$1,000 was made in 1884, and of the denomination of \$500 in 1885. The outstanding balance of the former was reduced in 1901 to 25 notes by the redemption of 20.

Four \$500 notes were redeemed in 1903, leaving 188 outstanding.

PAPER CURRENCY PREPARED FOR ISSUE AND ISSUED.

The outgo of paper currency continues to increase, and in order to provide the means the preparation for issue has been forced forward. The number of pieces issued was 50.9 per cent greater in 1895 than in 1890; 39.6 per cent greater in 1900 than in 1895; 49.3 per cent greater in 1902 than two years before; 21 per cent greater in 1903 than in 1902, and 8.2 per cent greater in 1904 than in 1903.

This advance in issue was met by an increase in the number of notes and certificates made ready for use, of 80.8 per cent from 1890 to 1895; 55.5 per cent from 1895 to 1900; 56.9 per cent from 1900 to 1902; 8.5 per cent in 1903, and 7.4 per cent in 1904.

A comparison by pieces, total value, and average value of each piece may be examined below:

CURRENCY ISSUED BY MONTHS IN 1903 AND 1904 AND FIRST QUARTER OF 1905.

The notes and certificates issued in 1904 were 11,673,482 more in number than in 1903, and their value was \$98,988,000 greater, showing a growth of 8.3 per cent in number and 18 per cent in value. By reason of the large demand for gold certificates the average value was carried up to \$4.251 for each piece, 35 cents more than for the twelve months preceding.

In the first quarter of the fiscal year 1905 the pieces of currency issued were 6,281,267 more than in the same months of 1904, and the increase was 17.9 per cent. The average value received an increase of 12.3 cents over that of the fiscal year 1904.

The figures by months may be studied in this table:

REDEMPTIONS OF PAPER CURRENCY.

The growth in the number of pieces redeemed ran far ahead of those issued in the last fiscal year. This has been 26,427,836, or 21.5 per cent, against 11,673,482, or 8.3 per cent, over pieces issued in 1903, and the average value has been carried down to \$3.785. This may indicate that the lack of small bills has been to some extent made up, while the service of such currency has been so shortened as to call for renewal in larger measure.

For the first quarter of 1905 the redemptions were 2,438,718 pieces and 7.1 per cent more than for the same months of the preceding year.

The monthly transactions are set forth below:

PERCENTAGE OF VALUE OF NOTES AND CERTIFICATES REDEEMED.

Government paper currency outstanding was redeemed in 1901 to the share of 32.1 per cent; in 1902, 34.6 per cent; in 1903, 39.3 per cent; and in 1904, 42.6 per cent. The redemption of \$1 notes and certificates in the last fiscal year ran to the remarkable ratio of 96.1 per cent; those of \$2 to 86 per cent; and those of \$5 to 56.8 per cent. This activity has not before been paralleled, and shows that new silver certificates of these denominations are put out, on the average, the ones every sixteen months, the twos every eighteen months, and the fives every twenty-four months.

The redemptions of the respective denominations in every month for the last two fiscal years, as set forth in the annexed table, will be found interesting:

RECEIPTS FROM CUSTOMS AT THE PORT OF NEW YORK AND THE AMOUNT PAID IN GOLD FOR THE FISCAL YEARS NAMED.

Since all of our money has been maintained at a parity, the kinds of money received for customs at the port of New York have lost their significance. They serve now to prove how completely gold is used for such purposes and to illustrate the change in this respect in a quarter of a century. The subjoined figures point this moral:

Fiscal year.	Total receipts.	Paid in gold.	
		Amount.	Per cent.
1875.....	<i>a</i> \$108,590,256	<i>a</i> \$108,590,256	100.0
1879.....	<i>b</i> 97,343,818	<i>b</i> 37,265,940	38.3
1889.....	116,889,880	125,693,361	85.5
1899.....	137,182,228	107,896,355	78.4
1901.....	152,973,471	131,737,888	86.1
1902.....	165,143,740	155,369,917	93.9
1903.....	180,838,114	177,448,732	98.1
1904.....	170,155,181	168,076,895	98.6

a There are no data to show the kinds of money in which these duties were paid, but during this year all duties were payable in coin.

b The collections from July to December, inclusive, were \$49,127,818, of which \$35,970,357 was gold, equal to 73.2 per cent, while the collections from January to June, inclusive, were \$48,216,000, of which \$1,295,583 was gold, equal to 2.6 per cent.

IMPORTS AND EXPORTS OF GOLD DURING 1904.

Abnormal foreign payments became necessary in perfecting the arrangements for the Panama Canal, although this Government closed its part in the matter on our own soil. Receipts of gold in San Francisco, chiefly from Japan, more than offset such exports. A balance of \$17,595,382 of net imports was created.

The figures show:

IMPORTS AND EXPORTS OF GOLD COIN AND BULLION AND GOLD IN ORE DURING THE FISCAL YEAR 1904.

Kind.	Imports.	Exports.	Net imports.	Net exports.
Gold coin and bullion.....	\$77,535,222	\$80,726,919	\$3,191,697
Gold in ore.....	21,520,116	733,067	\$20,787,079

TRANSFERS FOR DEPOSITS IN NEW YORK.

The deposits of money in New York for payment by telegraph, chiefly in Chicago and New Orleans, for moving the crops, and latterly also to San Francisco, are in every year considerable in magnitude. They were in the calendar year 1900, \$27,036,000; in 1901, \$23,035,000; in 1902, \$22,676,000; in 1903, they advanced to \$35,154,000, and to October 31, 1904, they were \$18,590,222.32.

This latter sum is \$858,777.68 less than for the like period in the preceding year.

In recent years the rule which used to be in force of requiring deposits to be made in the kinds of currency needed at the point of payment, has been waived. Now gold only is deposited in New York, while silver certificates of \$5 and below, United States notes of \$10, and gold certificates of \$20 make up by far the largest part of the payments.

During the current year a deposit of \$50,000 was received in the Chicago office, which was transferred by telegraph to New Orleans.

The subjoined tables show the direct share of the Treasury in such transfers for moving the crops in all the months in which transactions took place in the years mentioned:

EXCHANGE FOR GOLD RECEIVED AT WESTERN MINTS AND ASSAY OFFICES.

Depositors of gold, ore, bullion or foreign coin, at mints or assay offices can receive in return coin, checks on the Treasury office in subtreasury cities, or elsewhere checks on local depositary banks, or exchange on New York, Chicago, or San Francisco, or in the case of Helena on Philadelphia. To facilitate these transactions gold coin was in the last fiscal year sent from San Francisco to the Carson assay office to the amount of \$75,000, and to the assay office at Seattle, \$2,150,000.

The exchange given for this purpose in recent years is reported in the following table:

GOLD RECEIVED IN SAN FRANCISCO PAID FOR BY TELEGRAPHIC
EXCHANGE ON NEW YORK.

The extraordinary sum of \$51,796,743.02 gold in ore, bullion, and foreign coins was deposited in San Francisco for telegraphic exchange during the past fiscal year. Japanese yen represented \$34,077,815.58; other foreign coins \$7,407,124.53, and new products of the mines furnished \$10,311,802.91. In the first quarter of 1905 the amount deposited was \$14,930,609.67.

The details are reported below:

By reason of miscalculation on the part of depositors or of a change in conditions, it has not infrequently happened that the sums proffered have been less than those originally named. Latterly this failure to act upon the options granted has covered comparatively small amounts, as effort has been put forth to prevent the appearance of excessive figures in anticipated movements. The difference between the deposits authorized and those actually recorded were:

AMOUNTS NOT DEPOSITED.

SHIPMENTS OF CURRENCY FROM WASHINGTON.

The business of the country adds year by year to the work of the cash division of the Treasury as to other divisions. This addition to the labor and responsibility of the head office in Washington can be illustrated by the shipments of currency. In the last fiscal year the number of packages sent away rose from 68,449 to 75,713, an increase of 10.61 per cent over the twelve months previous, and the amount from \$459,245.112 to \$552,133,838, an increase of 20.23 per cent.

Details of the last two years are recorded here:

REDEMPTIONS AND EXCHANGES.

The moneys received on this account at all the Treasury offices during the fiscal year 1904 were \$1,014,158.262 and exceeded those of the preceding twelve months by \$149,654,701, or 17.3 per cent. The payments in gold in both forms were \$164,209,708 more than the receipts in such money. These payments were chiefly in redemption of silver in its three forms, but in part also in redemption of United States notes and for national-bank notes.

The transactions may be studied in the figures appended:

REDEMPTION OF NOTES OF NATIONAL BANKS.

The national-bank notes presented for redemption during the year, in 23,860 packages, amounted to \$262,141,930, or 61.12 per cent of the average amount of the notes outstanding. Compared with 1903, this sum is \$65,712,309, or 33.45 per cent greater, and it is the largest sum presented for redemption in any year of the thirty in which such redemptions have been made at this office. In the first half of the

year the amount presented was \$111,863,945; in the second half it was \$150,277,985. The monthly extremes were \$13,654,484 in November, and \$29,541,701 in January. Of the amount received for redemption \$141,660,000, or 54.04 per cent, came from New York; \$22,834,000, or 8.71 per cent, from Boston, and \$21,910,000, or 8.36 per cent, from Chicago. From no other place was there received as much as \$20,000,000. There was redeemed 65.39 per cent of the average amount of the \$5 notes outstanding, 56.03 per cent of the \$10 notes, 59.07 per cent of the \$20 notes, 70.82 per cent of the \$50 notes, and 81.89 per cent of the \$100 notes. The total number of notes redeemed was 22,735,640, and their average value was \$11.53.

Of the proceeds of redemptions for the year, \$95,594,893.78, being 36.52 per cent of the whole, was remitted by 4,833 transfer checks drawn on the subtreasury offices; \$123,598,051.41, or 47.22 per cent, by 14,413 shipments of United States currency; \$31,829.60 by 45 shipments of silver coin; and the remainder, \$42,517,611.86, was credited in accounts. These payments do not materially differ from those of 1903, when the checks were 32.36 per cent and the shipments of currency 48.85 per cent.

The notes assorted and delivered on the various redemption accounts amounted to \$259,406,931. Of these, \$92,025,555, or 35.48 per cent, were fit for circulation, and were forwarded by express, in 62,663 packages, to the respective banks of issue for further use, and \$167,381,376 were delivered, in 115,862 packages, to the Comptroller of the Currency for destruction, \$136,444.405 to be replaced with new notes and \$30,936,971 to be retired from circulation. Compared with the previous year there was an increase of 47.09 per cent in the amount of notes fit for circulation forwarded to the banks, and 27.89 per cent in the amount delivered to the Comptroller.

The lawful money deposited in the Treasury for the redemption of national-bank notes amounted to \$257,859,234.79. Of this sum, \$230,952,146.79 was for the 5 per cent account and \$26,907,088 for the retirement of notes under the various provisions of the law. Under the provision of law which limits the deposits for retirement of circulation to \$3,000,000 during any calendar month these deposits amounted to \$18,879,475, being about one-half the amount permitted, notwithstanding there were at some periods in the year applications to make such deposits much in excess of the monthly limit.

The redeemed notes of the New York banks were assorted and delivered 76 times during the year, those of the Philadelphia and Baltimore banks 48 times, and those of the Boston, Cincinnati, Chicago, St. Louis, and New Orleans banks 46 times. For the New York banks the redemptions amounted to 101.62 per cent of the average amount of their notes outstanding, for the Philadelphia banks 81.97 per cent, for the Baltimore banks 134.30 per cent, for the Boston banks 87.66 per cent, for the Cincinnati banks 52.43 per cent, for the Chicago banks 56.69 per cent, for the St. Louis banks 51.58 per cent, and for the New Orleans banks 74.87 per cent.

The redeemed notes of the banks outside of the above named cities were assorted and delivered as follows: Those of the New England States 40 times, those of the Eastern States 38 times, those of the Southern States 23 times, those of the Middle States 22 times, and those of the Western and Pacific States 16 times. The redemptions

for the banks in the New England States amounted to 73.25 per cent of their outstanding notes, for the Eastern States 80.46 per cent, for the Southern States 47.55 per cent, for the Middle States 39.59 per cent, for the Western States 36.79 per cent, and for the Pacific States 47.57 per cent.

The expenses of the redemption agency for the year consisted of \$95,580.12 for charges for transportation, \$114,540.80 for salaries, \$6,055.20 for printing, binding, and stationery, and \$2,917.01 for contingent expenses, making in all \$219,093.13, which sum was assessed upon the several national banks in proportion to their circulation redeemed, at the rate of \$0.84 $\frac{51}{1000}$ for each \$1,000. This rate of expense is 5 $\frac{54}{1000}$ cents less than the lowest rate heretofore made.

While there has been a large increase in the average amount of national-bank notes outstanding since the fiscal year 1900, the increase in the amount of notes presented for redemption has been larger. The details by years are shown in the following tables:

During the fiscal years 1900 to 1904 there was a net increase of 1,803 in the number of banks, making a total of 5,386 on June 30, 1904. The net increase during the fiscal year 1904 was 381. Since the redemption agency was established the number of banks has increased 3,403.

The amount of national-bank notes presented for redemption during the first three months of the current fiscal year was \$70,247,586, being an increase of \$11,607,579, or 19.79 per cent, as compared with the amount presented in the corresponding period of the last fiscal year. The amounts presented for the two periods are here contrasted by months:

SHIPMENTS OF SILVER DOLLARS.

The movement of silver dollars from the Treasury in 1904 was \$149,439 less than in 1903. Such shipments were \$27,283,457 in 1890; \$27,155,466 in 1895; \$36,284,791 in 1900; and \$41,032,715 in 1904. For the first quarter of 1905 the shipments exceeded those for the like period in the preceding year by \$2,195,951, or 17.6 per cent. The cost of transportation which is paid by the Government was \$1.93 per \$1,000 against \$2.03 in 1903 and \$1.99 in 1902.

EXCHANGE OF SILVER DOLLARS.

Silver dollars were presented at the Treasury offices for exchange into other moneys in the last fiscal year to an amount of \$4,457,655, or 10.7 per cent greater than in the previous twelve months. Such exchange is a movement into the Treasury, and it exceeded the shipments last year by \$5,065,599. These exchanges for July, August, and September last were \$418,743 more than in the same months of the year preceding.

This movement at the several offices is reported below:

SHIPMENTS OF SUBSIDIARY COINS.

To the subsidiary silver in circulation addition was made during the past fiscal year of \$2,801,649, carrying the total up to \$95,528,343. The shipments were \$270,503.25 more in 1904 than for the preceding fiscal year.

Payments of this coin for various purposes during the year amounted to more than \$24,900,000.

In the first quarter of 1905 the transactions were more by \$776,648.10, or 10.3 per cent, than for the same months of the year before.

By months the shipments were—

VOLUME OF MINOR COINS.

Minor coins are not included in the general statements of circulation, nor in the sum of money in use. Yet their aggregate value is considerable, no less than \$38,149,519.09 on June 30, 1904. An increase of \$1,583,715.03 took place in the 1-cent and 5-cent pieces during the fiscal year then ended, of which \$624,524.58 was in bronze cents and \$959,190.45 in nickel pieces of 5 cents.

The denominations of the coins outstanding and of those minted and remelted in 1903 and 1904 may be seen in the table appended.

SILVER AND MINOR COINS IN GOOD SUPPLY—DEMAND FOR NEW COINS.

The fact that the movement into the Treasury surpasses the outgo in the case of silver dollars, subsidiary coins, and minor coins, is suggestive. It doubtless signifies that the provisions of the Mint Bureau in these fields are now adequate for the immediate needs of the people, and that the task remains to look out for the requirements of the early future. Urgent requests frequently reach the Department for new coins, particularly for certain branches of the retail trade, and for institutions which make a specialty of business with women. It is a fair question how far the Treasury ought to go to furnish new coins from the Mint when coins hardly tarnished and in no way disfigured glut the subtreasuries. When this service can be rendered, the coins are shipped, but when those which are sent out are returned to the Treasury offices without marks of use, and after a very brief period of circulation, the gratification of a pleasant sentiment may be regarded as not of public advantage enough to justify the cost. While the outward flow was greater than that into the Treasury, this consideration did not

arise. The adjustment of the demand must be determined in view of the burden on the Government as well as the wishes of the claimants.

RECOINAGE OF GOLD, SILVER, AND MINOR COINS.

Worn gold coins reminted in 1904 exceeded in value those so treated in 1903 by \$502,923.50; silver coins were \$182,689.48 less, and minor coins were \$14,309.50 less in value in the later year.

The face value in each case, and the loss in gold and silver, respectively, are set forth in the subjoined tables:

SPURIOUS ISSUES DETECTED IN 1904.

In view of the vast volume of currency in circulation, and its variety, its good condition is shown by the fact that the diligence of the experts in the Treasury offices detected of spurious issues only \$12,714.95 in nominal value, in all kinds, during the past fiscal year. This is a smaller sum by \$673.60 than for the twelve months previous.

Nine compound-interest notes were rejected at this office.

CENTRAL PACIFIC RAILROAD NOTES AND BONDS.

Two of the notes of the Central Pacific Railroad held by the Government in settlement of the obligations of that road, and secured by its bonds, have been paid since the last report from this office. They were each for \$2,940,635.78, and were paid on January 31, 1904, and August 1, 1904, respectively. For this aggregate sum of \$5,881,271.56 bonds of the company, pledged as collateral for the notes, were released at the time of each payment.

Notes on the same account are still in the Treasury, to become due February 1 and August 1 in successive years, amounting in all to \$26,465,722.02, and secured by first-mortgage bonds of the company for \$26,466,000.

SPECIAL TRUST FUNDS.

The only change made during the year in the special securities held in trust was the withdrawal on February 13, by the Secretary of War, of \$5,000 in consols of 1930, which had been held for him.

The special trusts in the vaults of the Treasurer are:

Louisiana State bonds.....	\$37,000.00
North Carolina State bonds.....	58,000.00
Tennessee State bonds.....	335,666.66 $\frac{2}{3}$
Total.....	430,666.66 $\frac{2}{3}$

United States bonds are held by the Treasurer, under specific provisions of law, as follows:

American Printing House for the Blind, 4 per cent.....	\$250,000
Manhattan Savings Institution, 4 per cent.....	75,000
North American Commercial Company, 2 per cent.....	50,000

DISTRICT OF COLUMBIA.

The transactions of the Treasurer of the United States, ex officio commissioner of the sinking fund of the District of Columbia, pertaining to the affairs of the District, are fully set forth in a separate report.

During the fiscal year 1904, the bonds of the funded debt retired, including the bonds called, on which interest has ceased, amounted to \$427,150, resulting in a net reduction of the annual interest charge by \$15,931.57.

From July 1, 1878, to the close of the fiscal year 1904, the bonded debt was increased by the issue of 3.65 per cent bonds for \$1,229,550, and decreased by the operations of the sinking funds and otherwise \$10,843,500, making a net reduction of \$9,613,950, and of the annual interest charge \$559,775.57. The interest-bearing bonds of the funded debt outstanding June 30, 1904, were \$12,492,700.

Since the close of the fiscal year the debt has been further reduced by the purchase of 3.65 per cent bonds for \$441,350. This leaves outstanding October 1, 1904, \$12,051,350 in bonds bearing 3.65 per cent interest.

At the close of the fiscal year 1904, the 10 per cent guaranty fund held for account of District contractors amounted to \$378,128.97, and was credited to 113 separate contracts. Of this sum \$336,216.85 is invested in bonds purchased at the request and risk of contractors.

The Treasurer has been the custodian of the police and firemen's relief funds since March 23, 1885. The police fund then consisted of 3.65 per cent bonds for \$23,000 and \$108.92 in cash, and the firemen's relief fund of \$711.17 in cash. These funds steadily increased for five or six years, and then, owing to increasing demands for the benefit of the police and firemen, they rapidly decreased until in 1896 the funds were dissipated. The District appropriation act approved June 11, 1896, provided for the deficiency in these funds by appropriating the necessary amounts thereafter from the receipts from fines in the police court. Therefore, as there can be no surplus to invest, the Treasurer, in order to avoid an unnecessary number of accounts, on December 8, 1903, deposited these funds then in his disbursing account, in the Treasury in the general account to the credit of the respective funds, and all sums received for these accounts thereafter were in like manner deposited directly in the Treasury.

The receipts during the year for account of the police relief fund were \$54,104.73, and for account of the firemen's relief fund \$21,658.76. These sums were advanced to the Commissioners of the District in monthly installments.

The securities of the District in the care and custody of the Treasurer are:

3.65 per cent bonds (unsigned).....	\$4, 149, 950
Bonds for account of District contractors.....	295, 980
Chesapeake and Ohio Canal bonds.....	84, 285

THE WORK OF THE TREASURER'S OFFICE.

In every branch the work of the Treasurer's Office grew rapidly during the past fiscal year. The details of receipts, payments, issues, redemptions, shipments of currency and coins, and exchange, are presented on the preceding pages. As nearly as can be reckoned, for accounts and some other items can not be compared fairly by figures, the growth in the office as a whole has been over 18 per cent, while additions to the force, including details, have been only 4.1 per cent.

The business transacted by mail illustrates in part the operations of the office. The value of registered letters sent during the year advanced from \$16,305,788.59 to \$43,861,228.97, or 168.9 per cent, while that of registered letters containing currency received, increased from \$1,233,575.10 to \$1,289,268.26, or 4.5 per cent. Registered letters contained bonds amounting to \$31,371,639.07, and this is less than last year by \$25,850,730.75.

The table following recites the details:

With the rapid strides in the vast monetary business of the Government, the loyalty, energy, conscientiousness and efficiency of every person in the Bureau of the Treasurer have kept quick pace. Zeal, alacrity and a full sense of responsibility have governed the staff, chiefs of divisions, clerks of every grade, and every person employed. Their capacity, intelligence and experience have borne ripe fruit. The Department and the country are to be congratulated on service so faithful, so conscientious, and so valuable. With every year the privilege and duty of bearing this testimony to the character and work of every member of the force are more grateful and more imperative.

Respectfully,

ELLIS H. ROBERTS,
Treasurer of the United States.

HON. LESLIE M. SHAW,
Secretary of the Treasury.
